EXPERIENCE

Nava – *Senior Software Engineer*

October 2021 – Present

- Streamlined the Massachusetts Paid Family Medical Leave application process, achieving a 30% reduction in completion time and a 20% decrease in monthly appeals
- Designed a reusable asynchronous reporting workflow (AWS SQS + ECS Fargate tasks) that powered long-running reports for both employers and claimants
- Contributed to CMS React/Node application that shortened cloud onboarding time from months to weeks
- Remediated critical AWS infrastructure vulnerabilities using Terraform to meet CMS security standards
- Managed up to five engineers while remaining hands-on, running 1:1s and performance reviews to drive individual growth

Wells Fargo – *Software Engineer*

December 2017 – July 2021

- Redesigned a React dashboard that centralized traffic metrics for hundreds of key marketing analytics reports, replacing multiple separate tools
- Standardized the team's Node/React development process, cutting deployment time in half and improving SLA times for internally requested tools
- Mentored 4 junior onshore and offshore team members, acted as a point of contact for internal clients, and developed metrics to assign and measure new projects

Children's Council of San Francisco – *Web Developer*

February 2016 – December 2017

- Refactored ColdFusion/SQL Server childcare provider matching app, increasing successful matches by 30%
- Initiated new Twilio API phone campaign that boosted phone call return rates and improved metric visibility for management

Kaiser Permanente Division of Research – *IT Analyst*

July 2010 – February 2016

- Connected Oracle and SQL Server research data to the internal knowledge management portal using C# visual web parts, providing analysts self-service access
- Implemented ASP.NET Web API web services for development teams to more easily access health research data
